"3-in-1" Polyvinyl Sign Frames deliver three possible configurations

You can make three different sign configurations from one "Three-in-One" Polyvinyl Sign Frame. It accepts substrates up to ¼-in. thick, including economical 3mm corrugated plastic, and supports it on all four sides. The frame snaps together quickly, without nuts and bolts, and the substrate slides in from the top. The complete unit weighs less than five pounds. Foot spikes snap into bottom of the frame posts for installation.

Scan a paint sample to find the Matthews Paint color formula

Matthews Paint and MeasureColor have introduced a color-scanning tool that lets you scan an existing paint sample to determine the Matthews Paint color formula. The portable color scanner weighs about an ounce and pairs with a smartphone or tablet. The associated app then provides the color formula.
